Experiment 3

Aim : Create a GitHub/GitLab repository and upload sample code

Step 1 : git clone https://github.com/Celi0o0/OST-LAB-GAEABLE.git
fatal: destination path 'OST-LAB-GAEABLE' already exists and is not an empty directory.

Step 2 : cd OST-LAB-GAEABLE

Step 3 : git add sample.py
fatal: pathspec 'sample.py' did not match any files

Step 4 : pwd
/c/Users/Dominique Marvyn/OST-LAB-GAEABLE

Step 5 : nano sample.py

Step 6 : ls
'01CE0618 - Open Source Technologies Syllabus.pdf'   README.md
OST1.pdf   sample.py

Step 7 : git add sample.py
warning: in the working copy of 'sample.py', LF will be replaced by CRLF the next time Git touches it

Step 8 : git commit -m "Add sample Python script"
[main af68dfd] Add sample Python script
1 file changed, 6 insertions(+)
create mode 100644 sample.py

Step 9 : git push origin main
remote: Permission to Celi0o0/OST-LAB-GAEABLE.git denied to gaeablejeandominique-del.
fatal: unable to access 'https://github.com/Celi0o0/OST-LAB-GAEABLE.git/': The requested URL returned error: 403

Step 10 : ls
'01CE0618 - Open Source Technologies Syllabus.pdf'   README.md
OST1.pdf   sample.py
